Template Documentation

Adobe Photoshop / Fonts

Thank you for purchasing this template and hopefully you will find it easy to update and use.

You'll find well organized templates for easy use. Each template has been all set up for you and is ready to go.
Even a novice in Photoshop will be able to add their own information.
Now we'll go through how things are organized and used, plus tips on editing your mockup.

Templates Content

The files included are:

1. Adobe Photoshop (.PSD) versions for use in CC2 and above.
2. This documentation PDF.

Image Credits

Images used are by the Author. The images used in the template preview are for illustrative purposes only and should not be used for commercial purposes.

From the Author

I hope you find everything you need in this documentation and have fun with your own mockup template.
If you have any questions about the template or this help file, you can contact me through the contact page. Enjoy!

Learning **How to Edit with Photoshop**
Overview of the PSD file included, how it is organized and how can you edit it.

Step 1

Open the PSD file.

Step 2

The files in the folder PSD are all well organised with layers which are for ease of finding which elements you need to edit.

In the template, go to Window > Layers.

Step 3

Double click on the layer that you want to replace.

Step 4

A new window will open where you can put in your design

Step 5

After editing and replacing just save the work [Ctrl+s].
The mockup should be automatically updated
